

CDN Providers

Akamai

Akamai was established in Cambridge. It is a company that provides, among other services, a distributed computing platform for global Internet content delivery.

Amazon CloudFront

This web service speeds up the distribution of static and dynamic web content and user image files, delivering content through a worldwide network of data centers.

Aryaka

Aryaka offers network and security solutions, providing unified SASE (Secure Access Service Edge) as a service. It promises performance, agility, security, and simplicity to modernize and transform network and security environments smoothly.

Azure CDN

Azure CDN is a network of servers that speeds up the delivery of web content to users by caching static files on servers close to them to reduce latency and improve user access speed.

Alibaba Cloud CDN

This is a high-speed, stable, and customized content delivery service aimed at achieving efficient content distribution to users from anywhere.

CacheFly

CacheFly creates fast, dynamic, and global customer interactions by providing optimized CDN solutions, personalized service, and high-level security.

CDN Provider	Key Features	Type of Content Delivery	Security Features	Target Audience
Akamai	-Distributed computing platform -Advanced security features	Global content delivery	High-level security (DDoS protection, WAF...)	Enterprises with large-scale needs
Amazon CloudFront	-Fast delivery of static and dynamic web content. -Integration with other AWS services	Web content and images	Basic security options with AWS integration (WAF, SSL)	AWS users, developers, e-commerce sites
Aryaka	-Network and security solutions -Focus on performance and agility	Network optimization and security solutions	Strong security, SASE architecture	Enterprises looking for network and security solutions
Azure CDN	-Network of servers that cache static files -Reduces latency, improves speed	Web content (static files)	Basic security options (SSL, DDoS protection)	Microsoft Azure users, businesses needing fast delivery
CacheFly	-Fast, dynamic, and global content delivery -Optimized CDN solutions	Dynamic content	High-level security (DDoS protection, custom services)	High-traffic sites, media companies, e-commerce
